EDUCATION

Shri Guru Govind Singhji Institute of Engineering and Technology (SGGSIET), Nanded

Bachelor of Technology in Information Technology

2023 – 2027

CGPA: 8.76 / 10

Relevant Coursework: Database Management Systems, Machine Learning with Python, Operating Systems, Theory of Computation, Cryptography

RESEARCH INTERESTS

Database Systems, Machine Learning, AI for Data Systems, Data Processing, Network Security

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, SQL

Frameworks: Flask

Machine Learning: Supervised Learning, CNNs, Model Evaluation

Tools: Git, GitHub, VS Code

Concepts: Data Structures, Algorithms, Database Systems, Cryptography

MACHINE LEARNING KNOWLEDGE

- Supervised learning algorithms including Linear Regression and Logistic Regression
- Classification algorithms such as Decision Trees, Random Forest, and Support Vector Machines
- Deep learning fundamentals including Convolutional Neural Networks
- Model evaluation techniques including accuracy, confusion matrix, and cross validation

PROJECTS

Potato Leaf Disease Classification using CNN

Technologies: Python, TensorFlow, Keras

- Developed a deep learning model using Convolutional Neural Networks to classify potato leaf diseases into Early Blight, Late Blight, and Healthy categories.
- Applied image preprocessing and data augmentation techniques to improve model generalization.
- Trained and evaluated the model on a labeled dataset and analyzed model performance using standard evaluation metrics.

PDF Extract Outliner

Technologies: Python, JSON, Data Processing

- Designed a Python-based pipeline to convert unstructured PDF documents into structured hierarchical JSON data.
- Implemented data parsing and schema validation to ensure consistency for downstream data analysis.

Sudoku Solver and Game

Technologies: Java, Backtracking Algorithm

- Implemented a recursive backtracking algorithm to automatically solve Sudoku puzzles.
- Developed a graphical interface using Java Swing for interactive puzzle solving.

Machine Learning Model Deployment using Flask

Technologies: Python, Flask

- Developed a Flask-based web application to deploy a trained machine learning model.
- Implemented API endpoints for accepting input data and returning predictions.
- Built a simple interface allowing users to interact with the ML model through a web interface.

LEADERSHIP

Class Representative

2023 – Present

SGGSJET Nanded

- Coordinated academic communication between faculty members and a batch of 60+ students.
- Assisted in organizing academic activities and technical discussions.

ACHIEVEMENTS

- Ranked among the Top 20% students in the Information Technology department.
- Smart India Hackathon (SIH) 2024 – Selected for the initial round at national level.
- Secured high grades (A/A+) in Machine Learning and Cryptography courses.
